

Dadash Huseynzada

FRONTEND DEVELOPER

I am a front-end developer. I generally work with JavaScript libraries. These are the libraries I know of: React, Redux, and Next JS. I continue to learn new libraries. I also know how to work with many frameworks. Examples of these are Bootstrap, Material UI, Tailwind CSS, and React-Bootstrap. I share my projects as open source on my own GitHub page. I am a quick learner and always ready to learn new things. I am a team player and I can work under pressure.

KEY COMPETENCIES

Ui/Ux Desinger
Product Designer
Visual Desinger

Problem solving
Responsive Design
Version Control/Git

EDUCATION

National Aviation Academy
Bachelor's degree
2016-2020

Udemy
